

M36 Rectangular Structural Steel Uprights

Function: For use with today's thin wall construction which demands that the carrier support a lavatory, sink, urinal or water cooler, completely independent of wall construction.

Features:

1. With this modification, deflection is kept to a minimum, protecting the fixture as well as the finished wall.
2. Eliminates alternate steadying methods.
3. Cast iron adjustable brackets for either exposed arm or concealed arm installation.
4. Hanger support plate bolts directly to uprights for a simple yet strong installation.
5. Bases are welded to the
